**Behavioral Health Executive Council
Selected Fiscal and Policy Issues - House**

1. **Texas Psychology Licensing Exam.** Texas law (Occupations Code, Section 501.256) requires psychology license applicants to pass an exam designated by BHEC. Texas and all other states currently rely on a national exam owned by the Association of State and Provincial Psychology Boards (ASPPB), and as such, no alternative test exists. ASPPB announced an intention to require all states to adopt a second, additional skill-based exam in 2026 in order to continue using the existing knowledge-based national exam. BHEC believes the additional exam would unduly burden applicants and create unnecessary barriers to entry in the mental health industry without adding meaningful regulatory benefit. ASPPB put the plan to require a skills-based exam on hold after getting pushback from Texas and other states. However, BHEC still has concerns, as ASPPB has now stated an intention to reimagine the existing exam and include skills-based questions on it, essentially combining the two tests. The skills-based exam already exists, though it has been optional for states to adopt, and pass rates for the exam in states that have adopted it are low compared to the knowledge-based exam, increasing BHEC's concern that the second exam would represent a new and significant barrier to entry.

Due to these circumstances, BHEC is requesting \$125,000 in General Revenue in fiscal year 2026, with unexpended balance authority within the biennium, to contract with a test development vendor to complete the initial design phase of a Texas-owned psychology licensing exam that could be subsequently developed and administered as an alternative to the national exam if necessary.

2. **Indirect Administration Strategy Funding.** Recommendations reallocate \$1.2 million and 4.0 FTEs from Strategies A.1.1, Licensing, and B.1.1, Enforcement, to Strategy C.1.1, Indirect Administration, to more accurately reflect the agency's Indirect Administration costs. The agency's base request included less than \$122,000 in General Revenue and no FTEs in the Indirect Administration strategy. This recommendation increases the Indirect Administration appropriation by an amount equal to the salaries and other costs associated with the agency's: Executive Director; Deputy Executive Director; Chief Financial Officer; and General Counsel. See Appendix A for a breakdown of the amount of funding reallocated from each strategy.

Recommendations do not include the agency's request to reverse this change.
