Section 3a

Higher Education Fund Selected Fiscal and Policy Issues - Senate

1. **HEF Allocation.** Article VII, Section 17, Texas Constitution, requires the Legislature to determine the HEF allocation every ten years and to review the allocation at the end of the fifth year of the ten-year allocation. Because the HEF allocations began in 1985, the Eighty-fourth Legislature has the opportunity to both reallocate and increase the HEF allocation.

Pursuant to Education Code 62.022, the Texas Higher Education Coordinating Board (THECB) conducted a decennial review of the current HEF allocation formula with representatives from all HEF-eligible institutions. The committee put forward the following recommendations:

- a) Increase annual HEF appropriations from \$262.5 million to \$393.8 million for fiscal year 2016 through 2025;
- b) Maintain the set aside portion for the Texas State Technical College (TSTC) System at 2.2 percent of the annual allocation;
- c) Allocate the remaining 97.8 percent to the remaining HEF eligible institutions based on the following metrics:
 - Institutional Complexity—allocate 50 percent of the remaining funding based on each institution's All Funds formula funding for the 2016-17 biennium as introduced in House Bill 1, Eighty-fourth Legislature.
 - Space Deficit—allocate 25 percent of the remaining funding based on the space need reported at each institution as of Fall 2014. Institutions with a space surplus would receive no funding from this funding element.
 - <u>Facilities Condition</u>—allocate 25 percent of the remaining funding based on the institutions' campus condition index values as of Fall 2014.

The proposed allocation formula differs from the current allocation methodology by using updated data elements and setting the percentage split between the space deficit and facilities condition elements at 25 percent each rather than allocating funding between elements based on the combined monetized value of the two elements. Using the combined monetized value methodology, the amount of total funding for the space deficit and facilities condition element was determined by calculating the pro-rata share of each element based on the total monetary value of both elements. For the fiscal year 2011–2015 distribution, this calculation resulted in the following percentage allocations of the HEF distribution remaining after the TSTC set aside: 23 percent for space deficit; 27 percent for facilities condition. At this time, THECB is still finalizing the proposed HEF allocations for each institution for the 2016-2025 decennium.

2. **HEF Appropriations.** Annual HEF appropriations are set in statute. Therefore, legislation must pass in order for any changes in the total allocation amount or distribution amounts amongst the eligible institutions to occur. If no legislation passes during the Eighty-fourth Legislature, the current allocation amount and distribution methodology will continue.

¹HB 3001, 79th Legislature, 2005, reallocated the HEF allocation and increased total HEF appropriations from \$175.0 to \$262.5 million, but delayed the increase until the following biennium starting in FY 2008.

²In 2007, THECB identified errors in the space deficit element used to calculate the 2006-2010 distribution. Therefore, a corrected HEF allocation was calculated for fiscal years 2009-2010 and was included in HB 51 along with the updated HEF allocation for fiscal years 2011-2015.
