**Selected Fiscal and Policy Issues - Senate**

1. **Glaucoma Treatment Investigations.** Enactment of Senate Bill 993, Eighty-seventh Legislature, Regular Session, 2021, required the Optometry Board to investigate complaints regarding treatment of a patient's glaucoma by a therapeutic optometrist. In addition, the agency is required to select Texas ophthalmologists to review glaucoma complaints and submit expert reports to a panel composed of certain medical experts that would review these complaints. This panel would then issue a recommendation to the agency regarding any appropriate disciplinary action. The agency is also required to maintain online public information regarding the number of complaints filed and the disposition of these complaints.

While the fiscal impact to the state was not anticipated to be significant, the fiscal note for Senate Bill 993 indicated that costs related to expert review of complaints could not be determined and if the number or complexity of associated complaints increased, then the agency would not be able to absorb these costs with existing resources and may be required to raise fees. No contingency funding to implement this legislation was included in the General Appropriations Act for the 2022–23 biennium.

The agency has since determined that the cost to conduct investigations of glaucoma patients is \$20,000 each year, or \$40,000 for the biennium. These requested amounts are included in recommendations.
